

Sustainability

An Emerging Code Issue

What is Sustainability

The ability to remain diverse and productive indefinitely.

Environmental stewardship that takes an active role in air quality, brownfield redevelopment, energy management, environmental compliance, urban agriculture, recycling, and waste reduction.

Resilience

- Resilience is the ability of a system to absorb disturbance and maintain structure, viability, and services.
- 100 Resilient Cities initiative
- Alliance for National & Community Resilience

Sustainable Development Goals

- Blah
- Blah
- Blah

- Urban Agriculture
- Farmers Markets
- Wind Energy
- SolSmart
- Green Roofing
- Energy Audits
- Composting
- Waste Stream Regulations
- Education and Outreach

How Does this Effect my Community?
